

TITLE: "The Mini-Sweep" and its components.
COMPONENTS: "The Mini-Lifter", "The Mini-Sweep Mounting Bracket"
INVENTOR: Kevin King Irish
INVENTED ON: Jan. 11, 2003
ADDRESS: 20201 Gaukler St, St. Clair Shores, MI 48080-3772
PHONE: (586) 773-5303 (w/voicemail)
CITIZENSHIP: United States

CLAIM

(¶0001) I claim: "The Mini-Sweep" is an original cleaning device designed to clean specific areas with a "low clearance" i.e., under audio/visual components, between televisions and entertainment centers, along sides and tops of refrigerators, under microwave ovens, computers, etc.

(¶0002) "The Mini-Sweep" was inspired by the limitations of comparable, larger "sweepers" or "dusters", and may be used with only one hand. It incorporates a "removable/disposable cleaning pad or cloth" which cleans dust and dirt for flat surfaces. By design, "The Mini-Sweep" can reach into areas with only ¼ inch clearance (with use of 'The Mini-Lifter') or from ½ inch and larger clearances by itself. It is lightweight, and maneuverable, and all components can be easily stored on "The Mounting Bracket". It was also designed for ease of manufacture, packaging and sales.

(¶0003) I further claim: that the "Mini-Sweep" and its components, suggested material(s), dimensional specifications, usage, design, and name/title, are an original and unique invention of my own concept and creation.

(¶0004) My intentions are for the patent to be applied, and to be all-inclusive of "The Mini-Sweep" and it's components including "The Mini-Lifter" and "The Mini-Sweep Storage/Mounting Bracket", and packaged and sold to consumer as a "whole" or "complete" product.
